Comment Suggestion

I am taking this course during an important time to say at least. Along with the pandemic, I've had to deal with personal life, my research program, transitions, adapting, and moving into my apartment for junior year. Time was very limited to say the least and I could've done a lot of things better. However, I have learned a lot and this course has helped me to grow. Thank you Dr. Anomaly and Raj for this course and all that you have done for me.

Professor Anomaly was able to not only teach us the arguments of scholars in this field of study, but taught us how to critically analysis the material and ask scholarly questions. I feel that this skill can be applied to many classes in PPE. In addition, he is an extremely supportive and understanding professor who made this class a fantastic experience. I hope to be able to take another one of his classes in the future!

Great course

The opportunity to study alongside Penn students has been amazing! I hope to continue my PPE studies and higher education in general at UPenn.
