Course/Instructor Characteristics

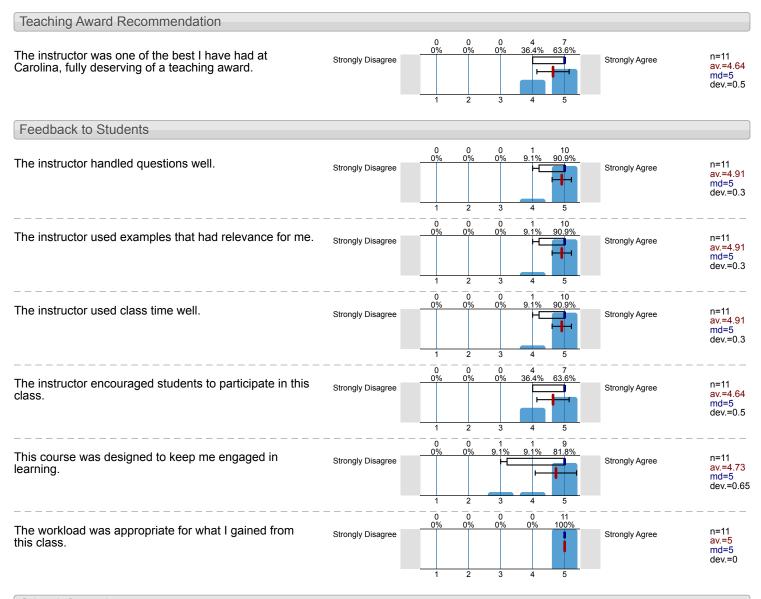

Comments on overall assessment of this course.

- Best class I have ever taken and also the most intellectually rewarding. No one should leave this class with the same views as before entering the class.
- This was a great course that challenged my ways of thinking about the world around me. Students were introduced to new ideas and were also given the resources to support these claims. The professor was also extremely excited and was determined to help us learn. Instead of teaching down to students, both professors required that the students meet their standards which was inspiring and motivational.
- This was my first class in college where the professor structured lessons as a dialogue with the students rather than a lecture. I found this a little intimidating at first, but by the end of the semester I really enjoyed it. The readings were thought provoking and although the lessons moved quickly they were clear and informative. With regards to the content of the class, I thought that the Prisoner's Dilemma/ Property rights/Distributive Justice units moved a little slow and were at times repetitive,which is fine, but I wish we had more times to spend with the Public Choice Theory/Markets in Everything sections. On the readings, I loved the distributive justice readings and I did not gain very much from Carol Rose "Liberty, Property, Environmentalism". I think that the Markets in Everything readings could have had more ties to game theory. I liked the ones we were assigned, but I didn't feel like they gave me as deep of an understanding of the topics as I wanted. I personally wouldn't have minded if we were given more readings, or maybe just optional additional readings. I also thought it was awkward to include the Alex Morris article about Miriam Weeks because she is still a Duke student. Overall, I really liked this class and it was evident how passionate the professors were about the material and their students.
- Wow, what a great class! The PPE Gateway exposes students to a variety of great thinkers, economists, and scholars. The information that we learn is practical and super relevant to other classes, too. I wish that everyone, including those who are not PPE minors, could take this course, as I feel that it has no equivalent and I know many people that would enjoy it.

Dr. Anomaly is one of the most enthusiastic and knowledgable professors I've ever encountered. His passion for the subject matter, coupled with his seemingly boundless knowledge, made the class very enjoyable and enlightening. Understanding that this class was cotaught with Duke, I would appreciate the opportunity to take another class with Dr. Anomaly exclusively at UNC--my experience this semester was wonderful!

Overall Course Assessment

Teaching Award Recommendation

The instructor was one of the best I have had at Carolina, fully deserving of a teaching award.

Feedback to Students

The instructor handled questions well.

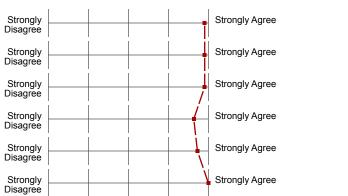

The instructor used examples that had relevance for me.

The instructor used class time well.

The instructor encouraged students to participate in this class

This course was designed to keep me engaged in learning.

The workload was appropriate for what I gained from this class.
